Part Number	Description	Notes
DM/RES/5829-023	Datacash Interface	This interface is only compatible with Datacash Terminal fitted with an Epson TM-930II Printer. For development times on other printer options consult Dedicated Micros.
DM/RES/5829-094	DataSym 2020 Serial Slip Printer Port Interface	
DM/RES/5829-112	DECPOS Display Port Interface	
DM/RES/5829-113	DIGIPOS Display Port Interface	
DM/RES/5829-011	Dresser Wayne Marketeer 2000 (E 512)	Dresser Wayne has released this terminal with two printer options either an Epson or an Olivetti . The exact terminal configuration must be checked before the interface is ordered. The interfaces are not interchangeable.
DM/RES/5829-013	Dresser Wayne Marketeer 2000 (PR 45)	Dresser Wayne has released this terminal with two printer options either an Epson or an Olivetti . The exact terminal configuration must be checked before the interface is ordered. The interfaces are not interchangeable.
DM/RES/5342-002	Dresser Wayne Nucleus RS-422 Display Port Interface	The American and European versions of this terminal have diversified and this means that it can no longer be regarded as a global system. The American version produces receipts on demand and maintains an electronic journal so we have to interface to the RS-422 customer display. We should be able to interface to the 'rebadged' Olivetti printer of the European version, which has the pre-fix 'ISM' in the model number
DM/RES/5829-035	Dresser Wayne Olivetti Interface	Dresser Wayne has released this terminal with two printer options either an Epson or an Olivetti . The exact terminal configuration must be checked before the interface is ordered. The interfaces are not interchangeable.
DM/RIB/5841-083	DTS 545 Interface	There are a range of DTS 545 terminals with a variety of printers and application software installed in the field. Compatibility must be checked with Dedicated Micros before any lead times can be quoted.

Part Number	Description	Notes
DM/RES/5829-103	Geller Vectron Mini-POS Serial Port Interface	The Geller-Vectron is a networked terminal and will most likely be configured to share a receipt printer and produce an electronic rather than paper journal. The Geller-Vectron has six RS-232 ports and provided that one of these ports is unoccupied then the terminal could be programmed as if a journal printer was attached to provide a data source for a POS/EM system. Programming would have to be completed by a Geller Cash Register dealer and is not included in the interface price.

DM/RES/5829-048	Uniwell UX 7000 Interface	This interface requires an additional RS-232 board is installed in the register and that the software on the main PCB of the ECR is upgraded, to version 3.09 or later, to allow the output of both prices and product descriptions. Uniwell also warn that if the software is upgraded from a release 2.xx version then ECR programming details must be saved before the EPROM's are changed as the memory mapping is significantly different between software versions 2.xx and 3.xx. Dedicated Micros does not supply the RS-232 board or any required software upgrades. Costs are not included in the price of the interface.
